Fencing Requirements

In an effort to establish guidelines and avoid confusion on fencing issues in the City of Lansing, the following will be the established procedure:

Must make application to the Department of Community and Economic Development on our online portal at: permits.lansingks.org.

For all permit applications received, **in addition to the site plan for the fence**, we will require the applicant to locate and mark with a lathe or **pin flag all property pins for the lot**, and to mark with a lathe or pin flag the proposed location of **each end post and corner post**, along with **each post** on any fence built on a curve, so that we may inspect **prior to approving the permit**.

In an effort to provide efficiency of time for everyone concerned, the City of Lansing will work to accommodate you with an inspection within **twenty-four (24) hours** of your satisfactorily completed application.

Call **913-727-2400** and notify the department when ready for an on-site inspection. The inspection will need to be completed before any part of the fence is installed, including the posts. The inspector will then check the property pins and proposed fence to be sure the proposed location complies with all regulations and only approve the permit if it does. This will eliminate misunderstandings and mis-measurements.

If the guidelines above are not followed on fencing permits, a citation will be issued, which requires a mandatory court appearance and will carry a fine of at least \$150.00, but not more than \$500.00 or imprisonment of not more than 30 days, or both.

Open Fence– those constructed of wood, masonry, metal woven wire or other material whose surface area is greater than 50 percent open. (Chain Link, Picket, Board on Board)

Solid Fence– those constructed of wood, masonry, metal or other material whose surface area is or may become less than 50 percent open. (Privacy)

Hedges and Evergreens– must be maintained not to exceed 4 feet in height along streets, alleys, or avenues.

PRECAUTIONS:

- **Prohibited Fences:** Barbed wire and electric fences within residential areas.
- **Placement** – placement in a **utility easement** is at the owner's peril.
- **Placement**– placement in a **drainage easement** is **not allowed** without prior approval and conditions.
- **Front yard fences**- must be of the open type and cannot be more than 48 inches above the natural contour of the ground.
- No open fence in side or rear yards may exceed 72 inches in height or pass the front building line of the home.
- No solid fence located in rear or side yard may exceed 72 inches above the natural contour of the ground or pass the front building line of the home.
- City Inspector may allow a solid fence not to exceed 7 foot around paved patios or swimming pools.

ALL FENCES MUST REMAIN 12” FROM PROPERTY LINES UNLESS WRITTEN PERMISSION IS ON FILE WITH THE PERMIT.
